DIGITAL
WALLCOVERINGS

More Than Digital Wallcoverings…

Welcome to the new Level collection, featuring our latest show-stopping designs and colors as well as two new product offerings! High Performance Standard Repeat Window Films are perfect for quick and affordable privacy, and our rich Sibilance® High Performance Acoustic Felt brings sound control to any of our murals.

When it comes to interior surfaces, Level has got you covered.

Find the Level product that's right for you at **findyourlevel.com**.

leVel DIGITAL WALLCOVERINGS

Exclusive Designs, Rights-Ready & Customizable

Extraordinary, high-resolution, print-ready designs that are only available in this program.

Ready to specify as-is or adapt to your needs. Customize design, color, substrate, & effects. Customize layouts & sizing. Or we can create a new design tailored to your needs and creative vision.

Thousands of designs in our archives that are available to specify as Level digitally produced wallcovering.

Exciting New Products, Industry-Leading Printing Solutions

Digitally Printed Embosses

Metallic Effects

Spot Gloss Effects

Unique Product Types for a Variety of Applications

Standard Wallcovering Solutions Featuring Type II 20 oz. Vinyls & Metallic Vinyls

PVC-Free Type II Wallcovering Products

Printed Window Film for both Privacy & Decorative Applications

Acoustic Fabric Solutions

Rigid Impact Protective Products

Many, Many More…

Pain-Free Project Management

With two decades of experience in custom digital wallcoverings specifically for the commercial contract market, we've become experts at our craft. From accuracy and quality to robust communication, we work tirelessly to ensure that each job is completed smoothly and efficiently, on time, on budget, and headache free.

NEW PRODUCTS

Quick, Affordable Privacy & Décor

Introducing High Performance Standard Repeat Window Films, a curated selection of repeat-pattern designs printed on our ever-popular Optically Clear Polyester Window Film.

- Printed with a frosted glass effect that's perfect for privacy!
- No need to measure; simply order by the roll - the film is meant to be installed horizontally across the glass. Each pattern is available in two standard sizes:
  - 40" Tall* x 120" Roll/Repeat
  - 59" Tall* x 180" Roll/Repeat

Want to customize it? Any of these patterns can also be ordered as a custom window film mural. Ask your sales representative for details.

*This is the height of the actual printed pattern. There is an additional 1" of unprinted film on each edge, so the actual film measures 42" tall / 61" tall.

Peace & Quiet

In need of sound control? Ask your sales representative about our new Sibilance® High Performance Acoustic Felt. Whether you're specifying a Level design or supplying your own artwork, our Sibilance® High Performance Acoustic Felt is an ideal solution!

- Derived from 100% post industrial recycled polyester
- Provides an acoustically rated noise coefficient (NRC) of .20
- Highly resistant to shrinking and stretching and has a high lightfastness rating (5)
- Easily installed using traditional wallcovering paste and butt seams leaving no visible overlap
- Does not absorb moisture making it a durable and long-lasting solution
- Silver & copper ions incorporated into the polyester fiber naturally attack microbes

SPECIFY

Standard or Custom?

STANDARDS: QUICK, SIMPLE, AFFORDABLE

Every Level design can be ordered "as-is", which simply means that they are printed with a predetermined combination of base material, effects if applicable (such as metallics), and our WallMax® coating. Every design and color that you see in this book is presented this way.

- Specifying a standard is an excellent option for those new to digital wallcoverings, or for anyone looking to achieve maximum visual impact quickly, easily, and affordably.
- Our experienced designers have created a wide range of pre-set options in our standard offering, so achieving stunning effects and unique environments can be as simple as specifying traditional wallcovering.
- All Level designs are rights ready, royalty-free, and print ready. Level owns – or maintains exclusive royalty agreements to – the exclusive rights to print all Level designs on wallcoverings. No usage restrictions, no need to negotiate licenses, no licensing or subscription fees.
- Note: All Level products are sized, scaled, and cropped to your specifications with the exception of our new High Performance Standard Repeat Window Films featured at the beginning of this book.

CUSTOM OPTIONS: FLEXIBLE, PERSONAL, UNIQUE

A key selling point of the Level program is the ability for designers and specifiers to tailor the designs to their needs, and there are a variety of ways in which our designs can be customized:

- **DESIGN CUSTOMIZATION** Includes overlaying or combining artwork, adapting a design to be a repeat pattern, changing the text of a word wall, and more.
- **COLOR CUSTOMIZATION** Our most popular customization! Color your mural or window film to fit your project's palette.
- **PRODUCT CUSTOMIZATION** Add effects such as WallFX®, Spot Gloss, or Metallic effects, or change the substrate from which the standard is printed.

ADDITIONAL SERVICES

As part of the Level program, we also offer print and creative services outside of this design library:

- Contract printing of customer supplied or third-party artwork
- Complete custom design services for customers wishing to create an original, unique piece of art

WallMax® Coating

Wherever applicable, Level products are coated with WallMax®, our protective liquid laminate, and we highly recommend its use on customized products as well.

- This UV curable coating provides added stain resistance to common concerns in high-traffic commercial environments.
- The coating formulation is heavy metal free with attributes that have been tested and proven to kill bacteria and prevent mold spores from forming, even in the most humid environments.
- WallMax® contains fire suppressing chemistry and has been tested and proven to contribute towards achieving Class A fire ratings through ASTM E84 test methods.

Materials

One of the great features of digital printing is the ability to produce your image on a wide variety of substrates, from vinyls to clear films to rigid materials and more. Our basic stable features about a dozen different materials, which are our most often specified materials (roughly 90% of the jobs we produce are on these). They are competitively priced, have been thoroughly tested, and are available to be very responsive to tight deadlines:

- **TYPE II 20 OZ. VINYL** | Smooth or Textured White, and Smooth or Textured Silver
- **OPTICALLY CLEAR POLYESTER WINDOW FILM**
- **TYPE II CARTA PVC-FREE PREMIUM CONTRACT WALLCOVERING** | Smooth or Textured
- **SIBILANCE® HIGH PERFORMANCE ACOUSTIC FELT**
- **RIGID IMPACT PROTECTIVE WALLCOVERING**

We can of course digitally print on hundreds of other materials, so if you have an inquiry for something else, or if the job calls out for a specific material, don't hesitate to ask. We have state-of-the-art print equipment and can print on just about anything our competition can. However, it is important to remember that printing on specialty materials nearly always involves a longer lead time, potential R&D, and more up front expense than our popular materials.

Specialty Effects

Our state-of-the-art equipment and advanced printing techniques allow us to embellish both Level and Non-Level designs with a variety of stunning specialty effects. While they may be used alone or in combination with one another to customize your mural, many Level designs now feature these effects as part of the standard design. These are indicated throughout this book in the pattern number below each design:

WALLFX® | Indicated by an X
Level's proprietary printed emboss effect which allows select areas of a design to be raised and appear embossed.

SPOT GLOSS | Indicated by a G
A special ink formulation that allows for select areas of a design to be coated with a glossy finish.

METALLIC | Indicated by an M
True, reflective metallic effects, achieved through a combination of inks and materials.

WHITE INK | Indicated by a W
White ink is used with both metallics and window films to create blockout effects that control the luster and/or opacity of other colors.

WINDOW FILM | Indicated by an F
Several Level designs are now available on window film as standard products.

Refer to the **findyourlevel.com** for additional designs featuring specialty effects.

Samples

While digital print technology allows for unparalleled design freedom, its print-on-demand nature necessitates some unique sampling and proofing solutions. Our goal is to provide the most accurate, beneficial, and cost effective tools possible to help you visualize the final product at various stages of development.

We have created an assortment of proofing devices, each targeted at demonstrating a specific task or specification. Depending on the complexity and level of customization associated with your project, you may receive one or more of these during the course of production.

Please visit the **findyourlevel.com** or contact your sales representative for more information regarding these tools or to order samples.

DESIGN MOCKUP | Digital PDF

A digital mockup of your artwork in an elevation view (or superimposed over an architectural elevation upon request). The intent of this mockup is to demonstrate how a requested design will appear when sized, cropped, scaled, and/or customized to your specifications.

FEELER SAMPLE | 4" x 8"

A small swatch of printed material is available for the most common Level product types. These demonstrate the various combinations of substrate material, inks, and coatings that are offered through the program, and include some basic specifications. Ordering **Feeler Samples** can be an economical way to consider multiple product types and/or various specialty effects (avoiding the need to order multiple **Strike-Offs**). Just curious? Your sales representative has a ring-set of all Level **Feeler Samples** and will be happy to show them to you.

MEMO SAMPLE | 8" x 10"

The **Memo Sample** features a large detail crop of the design and includes swatches of any customizable colors within the design. It is printed on the design's standard material (typically a Type II vinyl). The **Memo Sample** is always accompanied by a **Sell Sheet** that includes a thumbnail of the full design, a photo featuring the design in a room setting, and information regarding the design's scalability, pattern repeat, and color style (tonal or solid). Learn more about this information at **findyourlevel.com/ratings**.

STRIKE-OFF | 36" x 52"

The **Strike-Off** is your final sign-off prior to production. It is printed on your specified substrate and features a crop of the final artwork, demonstrating its actual production size, scale, color, material, and layout. **Strike-Off** approval is required prior to printing to ensure your satisfaction.

The Architect & Designers' Step-By-Step to Specifying

We recommend the following effective and efficient steps for specifiers, to save you time, effort, and money, and to make Level the easiest digital program to specify. While these steps may not apply to every scenario, they provide an excellent general outline to follow:

INITIAL STEPS

- **BROWSE** the Level books or findyourlevel.com to find the design(s) and/or product(s) that are of interest to you. Is one of our standards just what you need? Would a custom option work better for you? Make some preliminary decisions at this point.
- **DETERMINE** the dimensions and/or overall square footage of your project so that accurate budgetary pricing can be provided to you quickly.
- **CALL** your sales representative to discuss your project and obtain budgetary pricing based on the options you've selected. Your sales representative is here to provide guidance and take the heavy lifting off of your shoulders. Ask them to help finalize your choices and determine the right solution for your needs.
- **DOWNLOAD** images and spec sheets from findyourlevel.com to demonstrate your ideas to your client. Consider using these to get approvals at this stage, instead of requesting complete custom renderings from Level. Our experience shows that, because so much can change during the course of a project, customizing at this point can potentially be inefficient, spending your valuable time and billable hours needlessly.
- **PRESENT** these rough concepts and budgetary pricing to your client for approval. If any of the details need to be fine-tuned, this is the time to do so, but be sure to request updated pricing!

ONCE THE JOB GOES OUT TO BID

- **WRITE** the Level design, product selections, and any custom options into your spec to lock them in.
- **REQUEST** any custom changes from Level once all of the job specifics are approved by the end client. Level will create your custom design and provide you with complete custom renderings and other tools for final approval.
- **REVIEW** these tools with your client. Once approved you're ready to submit your order!

leVel DIGITAL WALLCOVERINGS

Environmentally Considerate Products

Our commitment to quality is consistent throughout our product commercialization process, from design conceptualization through manufacturing and finishing. We carefully select substrates due to the ever growing demands of the market, and to satisfy your customers' needs. Each of our substrates, protective UV-coatings and proprietary print techniques meet the highest testing standards, so you can specify our goods with ease.

SUBSTRATES

Level products are manufactured with PVC vinyl wallcovering materials that have met the sustainability certification created by the Wallcovering Association (WA) in partnership with NSF International and ANSI (American National Standards Institute) called the NSF/ANSI 342.

All PVC vinyl wallcovering substrates meet the Federal Specification for Type II durability as well as California Prop 65 compliance with Cadmium and Lead-Free formulations which also meet stringent EU toxicity standards.

PVC-Free substrates are also available from FSC Certified Paper with Type II durability in accordance with Federal Specification and with CHPS Section 01350 Specification and REACH compliance for EU toxicity standards.

UV-LED INKS

We proudly use the latest digital print technology with clean UV-LED inks with low VOC's in compliance with CHPS Section 01350 specification.

Our digital print equipment uses UL GREENGUARD Gold Certified inks (Certificate Number: 72318-420) and meet the California Department of Public Health's (CDPH) Standard Method using a Classroom Environment and Office Environment; tested in accordance with the UL 2822 method showing compliance to emission limits on UL 2818 Sec. 7.1 and 7.2.

UV COATING

To aid in the durability of our finished goods, our products may be laminated or top-coated with UV curable coatings to provide important resistance to common concerns in high-traffic commercial environments. The coating formulation is heavy metal free with attributes that have been tested and proven to kill bacteria and prevent mold spores from forming, even in the most humid environments.

Our UV-coating also contains fire suppressing chemistry and has been tested and proven to contribute towards achieving Class A fire ratings through ASTM E84 test methods.
