Solutions

Wallcovering

Browse our curated library of world-class mural style artwork and traditional repeat pattern designs and colors - only available through Level.

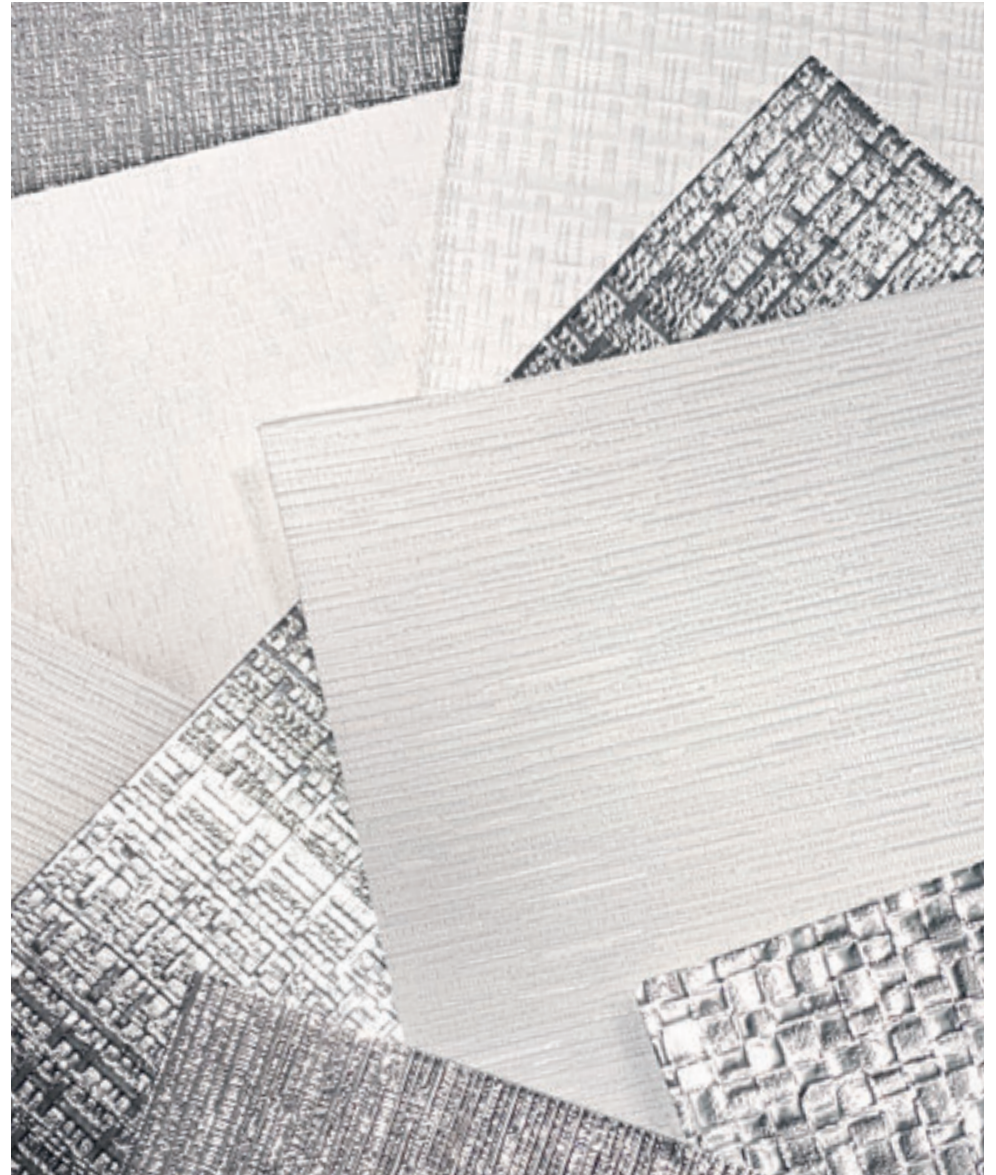

- High resolution, rights ready, royalty-free, and print ready artwork sized, scaled, and cropped to your specifications.
- Choose from a wide range of vinyls, PVC-free wallcoverings, and more on which your Level design can be printed.
- Tailor it! We offer near limitless ways to personalize your Level design, from simple custom color to digitally printed metallic & spot gloss effects and more.
- Have your own art? We offer contract printing of customer supplied and third-party artwork.

NEW EXCLUSIVE EMBOSSED VINYL

- Over a dozen new, exclusive embossed vinyls, ready to specify as the base material for your design.
- Available in white and silver mylar.
- Embossed vinyls meet the same performance specifications as our standard Stipple vinyl.

Visit
findyourlevel.com
or ask your sales
representative for
a complete list of
available embosses.

NEW! Several of the Mural Designs and all of the Pattern Designs in this collection already feature our new exclusive embosses.

Combine several of Level's unique design and print features for a complete wallcovering solution! **FEATURED:** L15-5201 Cross Weave - Antique with metallic effects printed on an exclusive embossed vinyl. The pattern is coordinated with mural design L15-0704MWG Koi Pond - Teal, which features both metallic and spot gloss effects.

Wood Veneer

Level wood veneers introduce the natural beauty of real wood to our growing collection of surface and design solutions. From solid color tints and accent patterns to full wall murals, wood veneers offer unparalleled creative opportunities.

REAL WOOD VENEER

- Available in Quarter Cut White Oak, Quarter Cut Walnut, and Quarter Cut Silkwood Recon. Flat sawn versions and additional species are available.
- Flexible, great for walls, ceilings, & furniture.
- Book Match (Standard) / Slip & End Match (Available)
- Class A Fire Rated
- Can be sequenced to adjacent panels & doors.
- Wood Veneer is supplied in 3 foot wide sheets (either 8 feet or 10 feet in height depending on the species) and the standard installation orientation is book-matched. Custom sheet sizes are available.

▪ NOTE:

Actual production may vary in color and graining from the images shown. The growth marks and other variations of grain and figuring found in fine veneers are hallmarks of this beautiful and natural product.

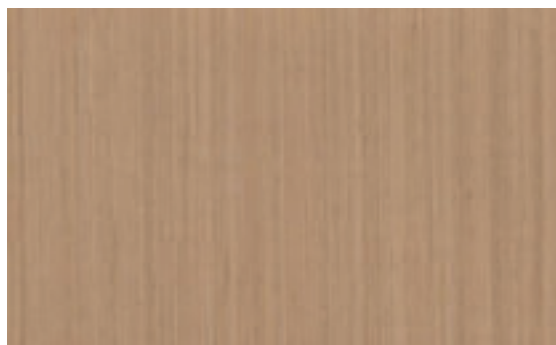

Specifying real wood veneer as a custom base material can alter the appearance of a design's colors and overall characteristics.

Metallic effects are not available on real wood veneer.

Areas in which real wood veneer will be installed must be environmentally controlled to maintain both temperature range and relative humidity!

Real wood veneer is not recommended for humid environments (over 55% relative humidity).

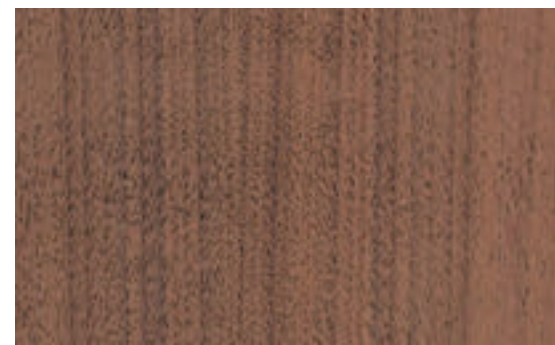

STANDARD VENEER SPECIES

LWV3012 Silkwood Recon - Quarter Cut

LWV3038 White Oak - Quarter Cut

LWV3043 Walnut - Quarter Cut

Solid Colors

Solid color tints are available on both wood species, and custom colors are available.

Colors shown on LWV3038 White Oak - Quarter Cut. Actual production may vary in color and graining from the images shown. Printing on different species of wood will alter the appearance of these colors.

High-Resolution Wood Veneer Images

We have high-resolution scans of these nearly two dozen additional species of veneer that we can print on any of our wallcovering substrates.

Print the veneer alone to simulate the look of real wood, or use it as a background with one of our Level designs.

Custom inlay effect of L15-2201 Lotus - Coral achieved by printing various species of high-resolution veneer images on LWV3038 White Oak - Quarter Cut real veneer.

LEFT WALL: L13-1601 Seashore - Caribbean (from Series 13) printed on LWV3038 White Oak - Quarter Cut real veneer. **RIGHT WALL:** and unprinted LWV3038 White Oak - Quarter Cut real veneer.

L12-2102 Luna - Oak (from Series 12) rendered in various solid color tints combined with a high-resolution image of Maple - Flat Cut wood, printed on white vinyl.

Example of a custom map design simulating the look of an epoxy pour, printed on LWV3012 Silkwood Recon - Quarter Cut real veneer.

Any of our real wood veneers can be replicated on vinyl with our high-resolution wood veneer images.

Window Film

Printed window films can be an effective way to infuse color and design into otherwise plain glass windows, partitions, and doors. In addition to their aesthetic appeal, printed films can also be used to add privacy, control light, improve way-finding, and more.

All of our window film products are printed on our high performance, scratch-resistant, optically clear polyester window film.

STANDARD REPEAT WINDOW FILM

- Standard Repeat Window Films are a curated selection of repeat-pattern designs meant to be installed horizontally across the glass.
- They are printed in either white ink or (only where indicated) in a frosted glass effect.
- Although not customizable as-is, custom options are available (ask your sales representative for details).
- Available in two standard sizes (no need to measure), sold by the roll:
 - 40" Tall x 120" Roll/Repeat
 - 59" Tall x 180" Roll/Repeat

WINDOW FILM MURALS

- Like our wallcovering murals, window film murals tend to be full height, "feature wall" applications, sized to your specifications.
- We offer a curated range of Level designs already featured on window film, but any design can be custom specified on window film.
- Custom colors are available as well as privacy options, stained glass effects, frosted effects, and more.
- Using our resources and print technologies to achieve your vision, we can help you create custom window film from scratch, or from your provided art.
- A variety of tools are available to help you create your custom window film. Ask your sales representative for details.
- **NOTE:**
 - Specifying window film as a custom base material can alter the appearance of a design's colors and overall characteristics.
 - Metallic effects are not available on window film products.

Acoustic Panels

In need of sound control? Our fabric-wrapped acoustical panels are an ideal solution! Your design or solid color is dye-sublimated onto one of our acoustically transparent fabrics: Nexa, Cinderella, or La Panne. All fabrics are 100% polyester, printed with dye-sublimated inks and are NFPA-701 certified. The printed fabric is mounted and wrapped around a polyester acoustic panel. (Fiberglass panels are also available.)

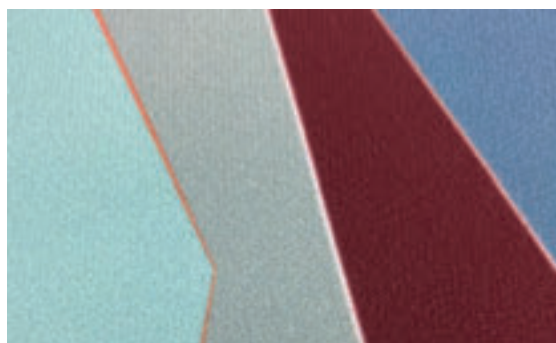

PANEL FEATURES

- 100% Polyester (60% PET-Recycled Fiber, 40 % PET-Virgin Fiber) with Chemically Hardened Edges
- 1" Thick / Custom Sized to Specifications Up to 48" X 120" (Custom thickness and shape options are also available.)
- NRC of 0.75
- Formaldehyde Free
- No Binding Agents
- Does Not Promote Mildew
- Tackable
- No Odor & Dust Free

MOUNTING OPTIONS

- Adhesive
- Impaling Clips
- Z-Clips/Z-Bars
- Edge Clips
- Rotofast Anchors
- Hook & Loop

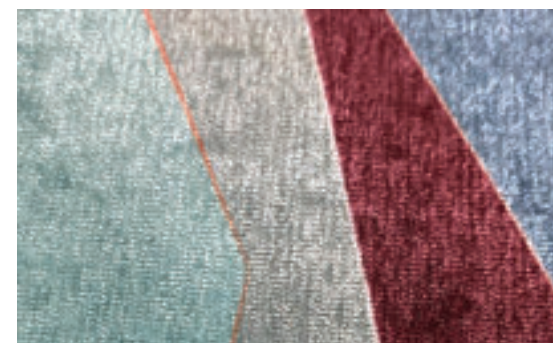

FABRIC OPTIONS

Nexa
Brushed Knit

Cinderella
High Luster Sateen

La Panne
Chenille

Due to the inherent nature of fabric, some designs are not recommended to print as continuous designs across multiple panels. Designs with very fine linework or patterns that require tight registration may not align well when installed adjacent to one another.

While Cinderella fabric has a sateen luster, actual metallics and gloss effects are not available on acoustic panels.

Solid Colors

Solid color tints (and custom colors) are available for all three fabric options.

Example of solid colors LF02 and LF10 printed on Nexa and wrapped around acoustical panels.

level

Example of custom design printed on Nexa and wrapped around acoustical panels.

Custom coloration of L50608 Lindsey - Zest (from Series 5) printed on Nexa and wrapped around acoustical panels. Panels are custom-cut to follow the shapes in the pattern.

Custom interpretation of L91906 Tangent - Safari (from Series 9) printed as follows: woodgrain and violet shapes on Nexa, light teal shapes on Cinderella, and dark teal shapes on La Panne. The printed fabrics are wrapped around acoustical panels that are custom-cut to follow the shapes in the pattern and stacked at various thicknesses.

Custom coloration of L92402 Whirl - Blueberry (from Series 9) printed on Nexa and wrapped around acoustical panels.

L15-0301 Vintage Skyline - Multi shown printed on Targa panels.

Protect Your Walls

Protect your walls! Targa rigid wall protection panels absorb the impact from hospital gurneys, luggage carts, and more. Ideal for walls that are in high traffic areas.

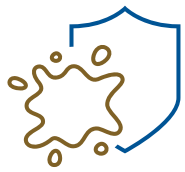

Targa is a clear PETG sheet, .040" thick, with the image printed on the back side of the material, encapsulating it against the wall and protecting it from wear and abrasion.

These rigid panels absorb the impact from objects like hospital gurneys, luggage carts, and more, maintaining the integrity of the wall.

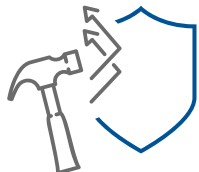

Any design in the Level collection can be specified with Targa as its base material.

Targa is available in both 4' x 8' & 4' x 10' sheets and is precision-trimmed at the factory. It can be installed with the panels butt-fitted together or with optional trim pieces available through Level.

NOTE: Gloss effects are not available on Targa.
