

level DIGITAL
WALLCOVERINGS

A Symphony for the Eyes

New designs and techniques featuring metallic & reflective effects, spot gloss overlays, and digitally printed embosses.

Look for these new effects throughout the collection and learn more at findyourlevel.com.

Exclusive Designs, Rights-Ready & Customizable

Extraordinary, high-resolution, print-ready designs that are only available in this program.

Ready to specify as-is or adapt to your needs. Customize design, color, substrate, & effects. Customize layouts & sizing. Or we can create a new design tailored to your needs and creative vision.

Thousands of designs in our archives that are available to specify as Level digitally produced wallcovering.

Exciting New Materials, Industry-Leading Printing Solutions

Digitally Printed Embosses

Metallic Effects

Spot Gloss Effects

Premium Type II 20 oz. Vinyl (Smooth & Stipple Finish)

PVC-Free Type II Wallcovering (Smooth & Textured Finish)

Printed Window Films

Acoustic Fabrics

Rigid Impact Protection Materials

Many, Many More...

Pain-Free Project Management

With two decades of experience in custom digital wallcoverings specifically for the commercial contract market, we've become experts at our craft. From accuracy and quality to robust communication, we work tirelessly to ensure that each job is completed smoothly and efficiently, on time, on budget, and headache free.

FEATURED ARTIST | Eileen Dorsey

Eileen Dorsey is a Cleveland native who graduated from Kent State University with a Bachelor's Degree in Fine Art in 2006. Since earning her BFA, Dorsey has shown her work in several regional galleries and museums, and examples of her paintings can be found in many public and private collections.

Her newest work focuses on the landscape that surrounds her, painted with vibrant color palettes and robust surfaces. Dorsey approaches each canvas with an aggressive, yet subtle sensibility – her tool of choice is the palette knife, and with it, she makes sharp decisions as she slathers, scrapes, and tosses paint across the surface of the canvas.

FEATURED ARTIST | Mark Thomas

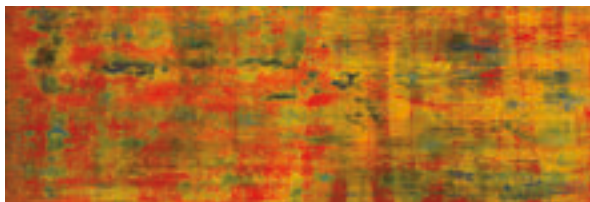

After receiving a BFA in painting from Kent State University, Mark Thomas moved to Cleveland, Ohio, and was immediately attracted to the decayed and industrial areas of the city.

Drawn to the textures found on the oxidized metal surfaces covering the city's bridges and abandoned structures, Thomas combed the rusty underbelly of the metropolis for inspiration. He began to experiment with automotive enamel and other industrial pigments – laying the paint down in thick layers, then stripping it back by applying a belt sander directly to the surface of the canvas, often leaving imperfections and holes in the process. Over time, he gathered the skills necessary to create these laborious compositions, while still enjoying the inevitable element of chance that informed each piece.

His Ballast series is a direct reaction to the urban landscape – tough, man-made, gritty, with bursts of vibrant color, and hints of America's industrial past.

FEATURED ARTIST | Bruce Checefsky

Bruce Checefsky is an award-winning photographer and independent filmmaker – his photographs and films can be found in the permanent collection of the Museum of Modern Art NYC and many other notable institutions.

To achieve his remarkable photographs, Checefsky devised a unique system of recording flowers and plants from his garden with a photo-scanner mounted to a tripod, then connected to a laptop computer, all of which he actually takes outside in his yard to use. Each scanned image is a detailed, one-of-a-kind rendering of the sophisticated forms and textures found in nature.

CREATE

Understanding Specialty Effects

Our state-of-the-art equipment and advanced printing techniques allow us to embellish both Level and Non-Level designs with a variety of specialty effects. These effects are excellent for use in “protected” areas, such as behind a headboard or other furniture, and they are the most noticeable and effective when properly lit by strong, directional lighting. Effects can be used alone or in combination with others to create a variety of stunning effects.

Designs that feature specialty effects are also available without these effects.

WALLFX®

Level’s proprietary printed emboss effect which allows select areas of a design to be raised and appear embossed. Designs featuring this effect are indicated by **X**.

Spot Gloss

A special ink formulation that allows for select areas of a design to be coated with a glossy finish. Designs featuring this effect are indicated by **G**.

Metallic

True, reflective metallic effects, achieved through a combination of inks and materials.

Designs featuring this effect are indicated by **M**.

Some Metallic effects necessitate the additional use of white ink to achieve a “blockout” effect, in which only selected areas appear metallic (as opposed to an overall metallic look). Metallic designs that utilize this additional white are indicated by **+**.

LEVEL DESIGNS FEATURING SPECIALTY EFFECTS

This chart itemizes the components in each standard Level design that features a specialty effect, from this book as well as all prior books.

SPECIFY

A Step-By-Step Guide to Specifying Level

1

SELECT A DESIGN & COLOR

The designs in the Level program are available in a range of colorations and many feature several layout variations. Each of these designs can be specified as is, or may be customized to better suit your needs.

Design Samples of all standard colorways are available to assist you in your selection. In addition to demonstrating actual color and scale, these samples explain the various types of customizations available for the design. We recommend requesting a Design Sample prior to finalizing any custom options.

2

CHOOSE CUSTOM OPTIONS

A key feature of the Level program is the ability to tailor the designs to your needs. There are a variety of ways in which our designs can be customized, and your sales representative can assist you with these choices.

Basic Customization

Basic Customizations are scaling, sizing, and cropping a design to your specifications.

Advanced Customization

This includes adapting a design to be a repeating pattern, custom overlaying or combining artwork, fitting artwork to a complex space where very specific tolerances are required, changing the text of a word wall, and any other adaptations to Level designs. Advanced Customizations also include adapting a Level design for use on window film (as shown throughout this book), printing with white ink on any material, and creating custom WallFX® (raised embosses).

Custom Coloration

The colors within Level designs can be changed to your specifications, though the intricacies of some designs can affect the way custom colors appear when printed. When customizing colors, our Color Book is strongly recommended and more accurate than other color references such as paint swatches, though both are acceptable.

3

DETERMINE SIZE & SCALE

All Level designs, customized or not, are sized to customer specifications. In many cases you will simply need to know the overall height and length/width of your space, and your selected design will be sized accordingly. If you have a complex installation that requires multiple sizes or custom fitting to intricate spaces, please have as much information as possible ready when you call for your quote.

4

SELECT A SUBSTRATE

One of the great features of digital printing is the ability to produce your image on a wide variety of substrates, from vinyls to clear films to rigid materials and more. Feeling overwhelmed? After two decades of experience, we recommend specifying one of these standard substrates:

Type II 20 oz. Vinyl (Smooth, Stipple Embossed, & Silver Smooth)

Optically Clear Polyester Window Film

Type II Carta Smooth PVC-Free Premium Contract Wallcovering

These are our most often specified and popular materials (making up roughly 90% of our production). They are competitively priced, have been thoroughly tested, and we keep them in inventory to help you meet tight deadlines.

We can of course digitally print on hundreds of other materials, so if your job calls for a specific material, don't hesitate to ask. We have state-of-the-art print equipment and can print on just about anything that our competition can. However, it is important to remember that printing on specialty materials nearly always involves a longer lead time, potential R&D, and more up front expense than the popular materials above.

Creative Expertise + Technology

The Level team are experts in the use of digital print technology for the commercial interior décor market. With nearly 20 years of experience, we have a deep knowledge and mastery of the intricacies of this technology. We also invest in the latest printing technology to offer the widest possible range of production options for our clients.

- **OUTSTANDING DESIGNS**

The heart of the Level program is its growing library of extraordinary designs. And behind those designs is the Level team of talented stylists and designers, who combine years of experience with fresh ideas and new outlooks on commercial wallcoverings. We keep a close eye on commercial wallcovering trends and styles, and creatively interpret that research into **exciting new designs that designers, specifiers, and their clients will love.**
- **EXPERIENCED PROJECT MANAGEMENT**

If you can dream it, we'll find a way to make it happen. Adapting artwork, illustrations, graphics or photography to a client's space and unique requirements is what we do best. With many years of successful projects under our belt, we know all of the unique challenges that come with custom digital wallcoverings, and we've amassed a considerable tool kit to address them. We continually manage projects and budgets of all sizes with the same care and attention to detail, and we're always eager to find the right solution for our clients.
- **STATE-OF-THE-ART PRINTERS & INKS**

Level wallcoverings are printed using the latest advancements in UV-based and latex-based inks on high-speed, large format digital presses. We maintain a close relationship with our hardware and ink suppliers, cooperating in R&D to improve the durability and applicability of our products. And our wallcoverings history and experience allows us to find solutions and tackle new challenges specific to **key commercial wallcoverings markets - healthcare, hospitality, corporate, and retail.**
- **NEAR LIMITLESS SUBSTRATES & DURABLE LAMINATES**

We are able to print your design on an ever-growing list of materials including Type II vinyls, PVC-free commercial wallcovering, window films, laminates, rigid materials, and more. Many of our materials feature environmentally friendly attributes, and we continually expand our offering of substrate materials to keep up with the demands of the market and **provide new options for designers and specifiers.** We also offer WallMax, our optional liquid laminate top-coat that provides additional durability and abrasion-resistance, and gives the printed surface of your mural a true Type II specification.

Environmental Responsibility

We proudly offer wallcovering options that meet the demands of our environmentally conscious customers without sacrificing the highest standards of artistry, quality, and durability. In particular, Level digital wallcoverings offer green solutions in both our print technology and our offering of printable substrates. We are also able to produce wallcoverings that, when printed with our latex inks on a PVC-free wallpaper, are GREENGUARD Children & Schools CertifiedSM, can help building owners obtain LEED credits, and meet AgBB criteria.

Level Proofing Tools Explained

While digital print technology allows for unparalleled design freedom, its print-on-demand nature necessitates some unique sampling and proofing solutions. Our goal is to provide the most accurate, beneficial, and cost effective tools possible to help you visualize the final product at various stages of development.

We have created an assortment of proofing devices, each targeted at demonstrating a specific task or specification. Depending on the complexity and level of customization associated with your project, you may receive one or more of these during the course of production.

Please visit the website or contact your sales representative for more information regarding these tools.

DESIGN MOCKUP

A digital PDF of your artwork in an elevation view (or superimposed over an architectural elevation upon request). The intent of this mockup is to demonstrate how a requested design will appear when sized, cropped, scaled, and/or customized to your specifications.

VINYL SAMPLE

This 17.5" x 24" sample features both a large detail crop and full thumbnail of a standard Level design. It is typically printed on Type II Stipple Vinyl, except when an upgrade materials (such as Silver Smooth) is the design's standard material. The sample also contains swatches of the colors within the design as well as information regarding the design's scalability, pattern repeat, and color style (tonal or solid). Learn more at findyourlevel.com/ratings. Design Samples can serve as your Strike-Off when specifying a standard Level design with no custom colors, when the scale of the final design is close to that of the sample scale, and when the material and presence of WallMax laminate match that of the sample.

SUBSTRATE SAMPLE

A small swatch of substrate material, including its basic specifications, is available for all standard substrates and many specialty substrates. These samples are available printed or unprinted.

COLOR BOOK

A set of approximately 1,200 color swatches printed on our Type II Stipple Vinyl. When specifying custom colors, the Color Book is strongly recommended and more accurate than other color references such as paint swatches*.

STRIKE-OFF

The Strike-Off is your final sign-off prior to production. It is printed on your specified substrate and features a crop of the final artwork, demonstrating its actual production size, scale, color, material, and layout. 36" x 52". Strike-Off approval is required prior to printing to ensure your satisfaction.

*Due to differences between paint and print technology and the paper of paint swatches and our vinyl, our Color Book is the most accurate method of selecting your custom color.

Like What You See?

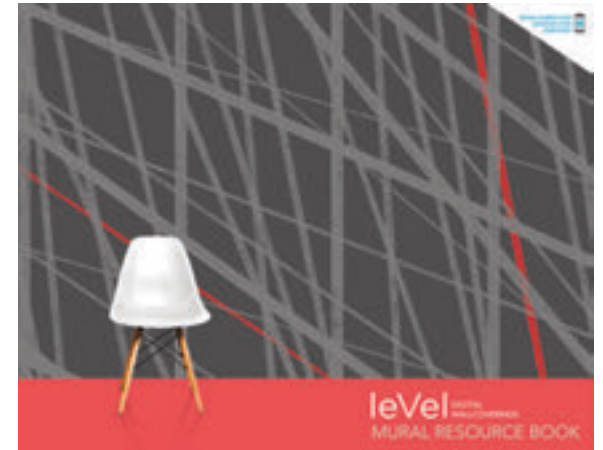

This book is the 8th in a series featuring designs from the talented creative team at Level (Series 1 & 2 were compiled in our first book), bringing our total collection to roughly 200 designs and nearly 1,000 different standard color and technique options. Every one of these designs is still available to specify as-is or customize and can be found at either findyourlevel.com or in one of our earlier books:

LEVEL SERIES 1 & 2

LEVEL SERIES 4

LEVEL SERIES 6

LEVEL SERIES 3

LEVEL SERIES 5

LEVEL SERIES 7
