

level DIGITAL WALLCOVERINGS

Welcome to the New Digital Age...

Stunning new metallic & reflective effects, spot gloss overlays, window film techniques, and digitally printed embosses.

Look for these new effects throughout the collection and learn more at findyourlevel.com.

Exclusive Designs, Rights-Ready & Customizable

Extraordinary, high-resolution, print-ready designs that are only available in this program.

Ready to specify as-is or adapt to your needs. Customize design, color, substrate, & effects. Customize layouts & sizing. Or we can create a new design tailored to your needs and creative vision.

Thousands of designs in our archives that are available to specify as Level digitally produced wallcovering.

Exciting New Products, Industry-Leading Printing Solutions

Digitally Printed Embosses

Metallic Effects

Spot Gloss Effects

Unique Product Types for a Variety of Applications

Standard Wallcovering Solutions Featuring Type II 20 oz. Vinyls & Metallic Vinyls

PVC-Free Type II Wallcovering Products

Printed Window Film for both Privacy & Decorative Applications

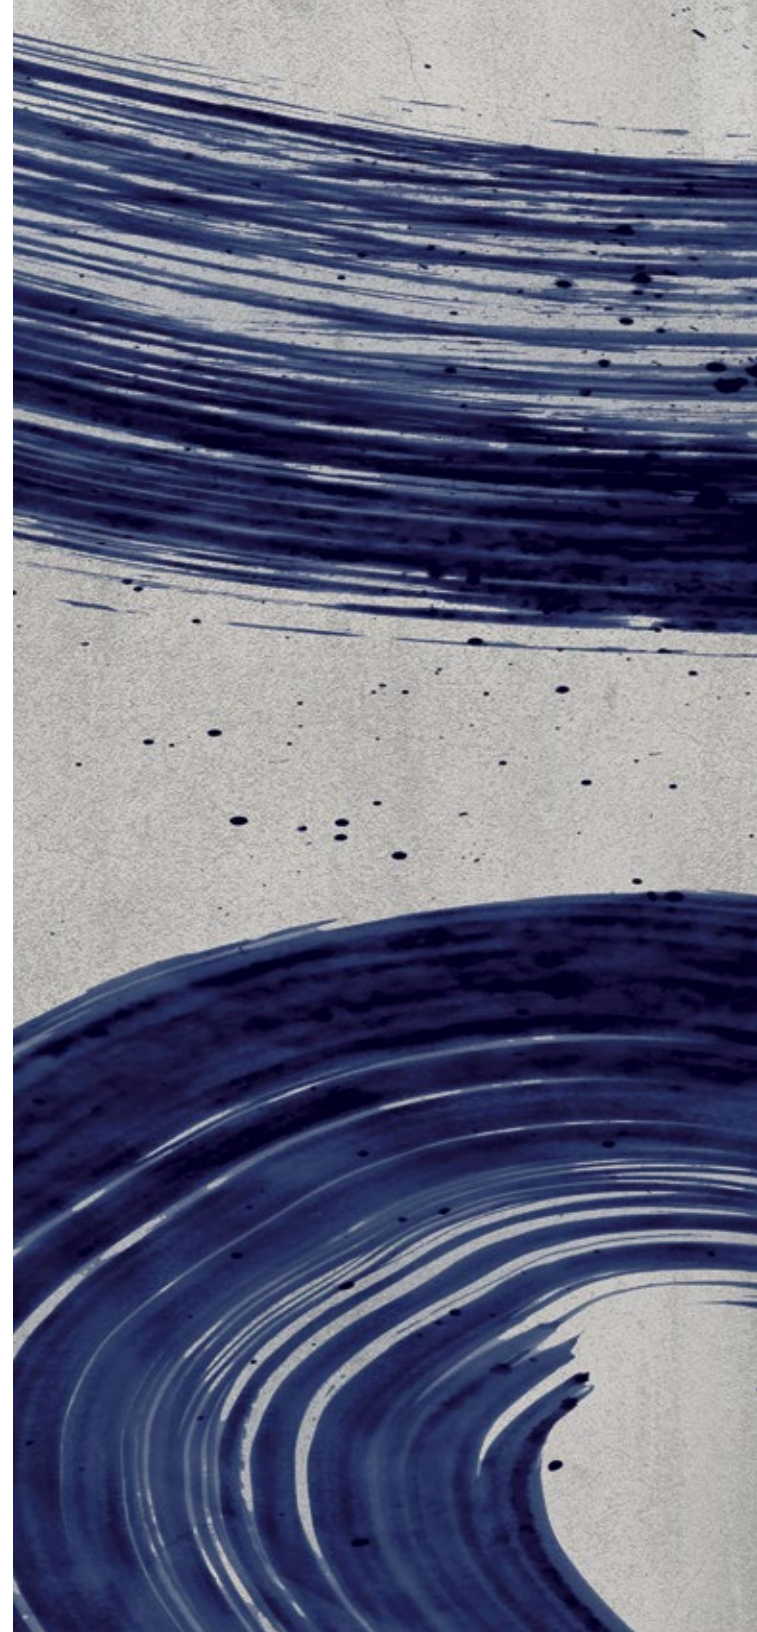

Acoustic Fabric Solutions

Rigid Impact Protective Products

Many, Many More...

Pain-Free Project Management

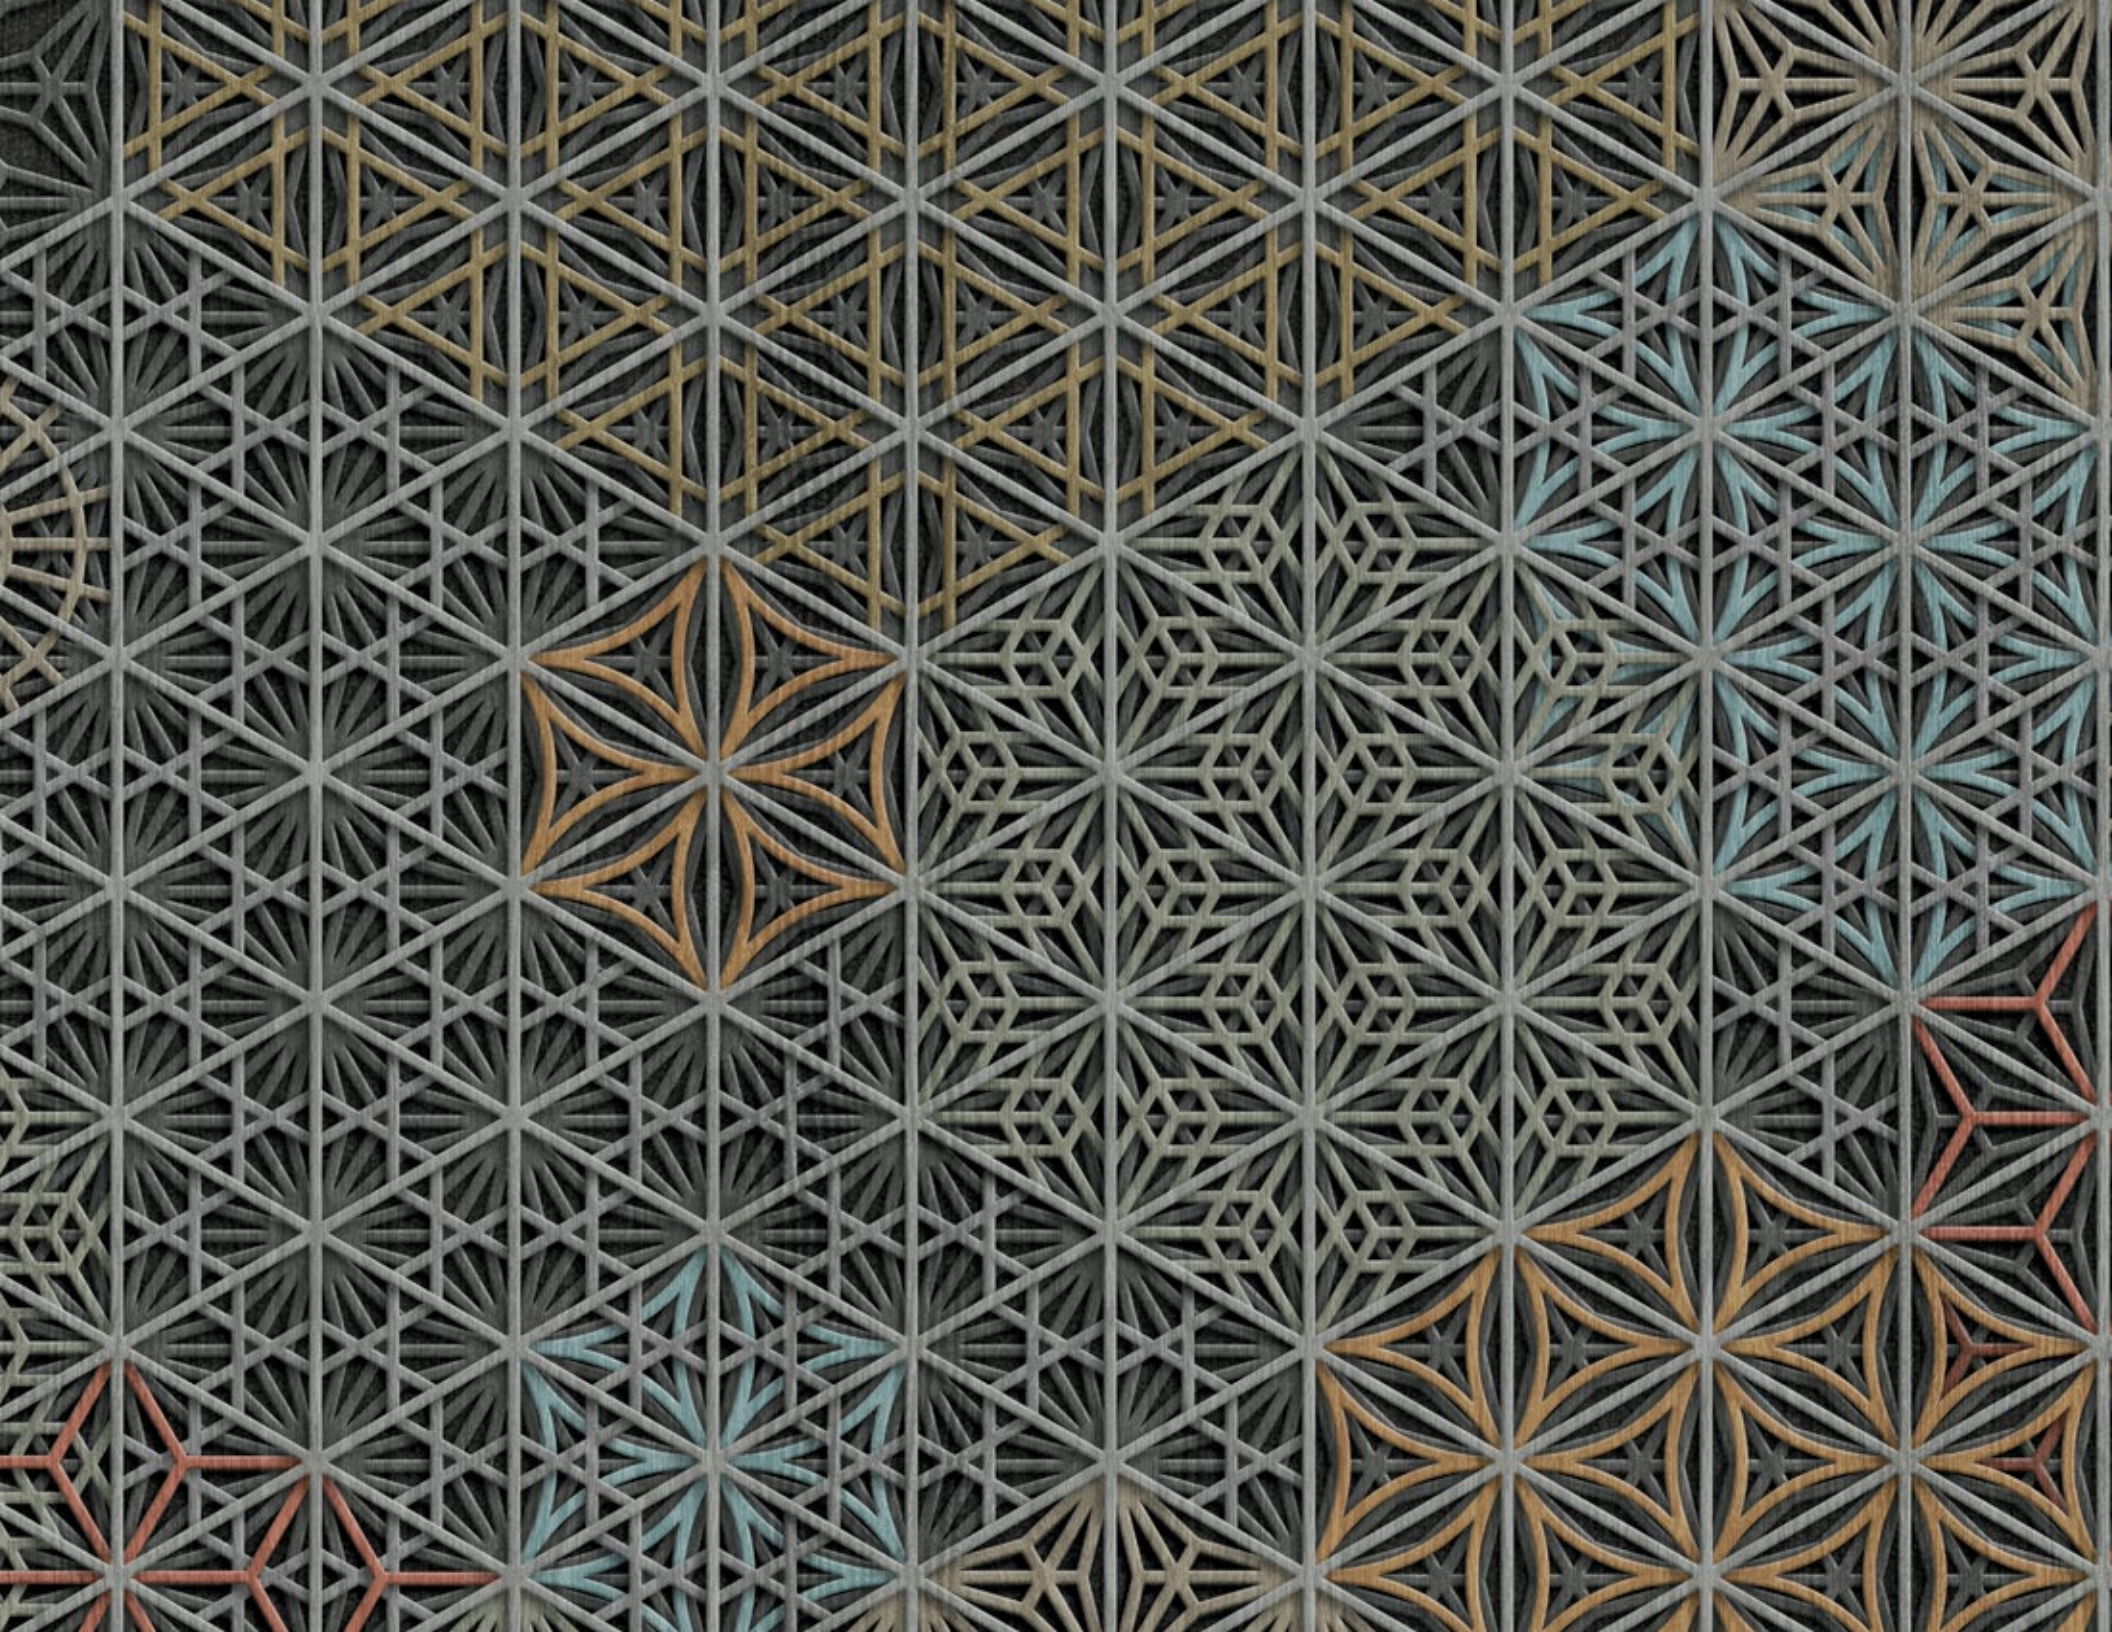

With two decades of experience in custom digital wallcoverings specifically for the commercial contract market, we've become experts at our craft. From accuracy and quality to robust communication, we work tirelessly to ensure that each job is completed smoothly and efficiently, on time, on budget, and headache free.

About Our Products

PRODUCT TYPES

The Level program offers roughly 20 different end products to suit a variety of applications. These **Product Types** are defined by a specific combination of **substrate material**, **inks**, **specialty effects**, and **coatings**, and they can offer both aesthetic options as well as performance features, making them a good starting point if your project requires some creative solutions.

Feeler Samples are available for all of our **Product Types**. See Page 92 for more information.

Our **Product Types** include:

STANDARD WALLCOVERINGS | 10 **PRODUCT TYPES**: A range of smooth and textured Type II vinyls in both white and silver. Some products feature Spot Gloss or WallFX®, and some are coated with our WallMax® liquid laminate.

WINDOW FILMS | 4 **PRODUCT TYPES**: Optically clear polyester window film printed with various combinations of inks to achieve frosted and/or glossy “stained-glass” effects.

PVC-FREE WALLCOVERINGS | 2 **PRODUCT TYPES**: Textured and smooth Type II wallcoverings that are PVC-free, coated in our WallMax® liquid laminate.

RIGID WALL PROTECTION | 1 **PRODUCT TYPE**: Rigid impact protective panels coated in our WallMax® liquid laminate.

ACOUSTIC FABRICS | 1 **PRODUCT TYPE**: An acoustically transparent fabric for use on sound-absorbative panels.

SPECIALTY WALLCOVERING | 4 **PRODUCT TYPES**: Includes and IMO Certified vinyl as well as several specialty embosses.

DESIGN STANDARDS

Every design and colorway featured in this book (and in the entire Level program) is a **Design Standard**, and it is produced as a specific **Product Type**. (In other words the **Product Type** is an integral part of any **Design Standard**.) As such, when you specify a given design from the collection, its substrate and specialty effects are already predetermined. While this allows for a wide range of solutions to be available as standard options, you can of course customize any of these components to better suite your needs.

Memo Samples are available for all of our **Design Standards**. See Page 92 for more information.

How to Order

1 CHOOSE A DESIGN & COLORWAY

Browse our extensive library of designs, featured online at findyourlevel.com and in this series of Level books. Every design is offered in a range of colorways and **Product Types** to help you find the one that's right for your application. **Memo Samples** of each of these standards are available to assist you in your selection. In addition to demonstrating actual color and scale, these samples explain the various attributes of the design.

2 DETERMINE SIZE & SCALE

All Level designs, customized or not, are scaled, sized, and cropped to your specifications. In many cases you will simply need to know the overall height and length/width of your space, and your selected design will be sized accordingly. If you have a complex installation that requires multiple sizes or custom fitting to intricate spaces, please have as much information as possible ready when you call for your quote.

3 REQUEST A QUOTE

Once you've selected your design & color and determined the size of your mural(s), simply contact your sales representative for a quote, or request one online at findyourlevel.com. Want more options? See the next page for all the ways you can customize our designs to better suit your needs.

Customize It!

Although the most efficient and cost effective option is to specify a **Design Standard**, a key feature of the Level program is the ability to tailor the designs to your needs. There are a variety of ways in which our designs can be customized, and your sales representative can assist you with these choices.

DESIGN CUSTOMIZATION

This includes adapting a design to be a repeating pattern, custom overlaying or combining artwork, fitting artwork to a complex space where very specific tolerances are required, changing the text of a word wall, and any other adaptations to Level designs.

COLOR CUSTOMIZATION

The colors within Level designs can be changed to your specifications, though the intricacies of some designs can affect the way custom colors appear when printed. When customizing colors, we highly recommend using "Level-Safe" colors, which include colors from an industry-standard color matching system as well as two leading commercial paint manufacturers. Please ask your sales representative for specific details.

PRODUCT CUSTOMIZATION

Any modification to the attributes of a design's standard product type constitutes a Product Customization. This includes adding, removing, or altering any specialty effects such as WallFX®, Spot Gloss, or Metallic effects. It also includes changing the substrate that the design is printed on as a standard, adapting a mural design to be printed on window film, and/or adapting a window film design to be printed as a mural.

Specialty Effects

Our state-of-the-art equipment and advanced printing techniques allow us to embellish both Level and Non-Level designs with a variety of specialty effects. These effects are excellent for use in “protected” areas, such as behind a headboard or other furniture, and they are the most noticeable and effective when properly lit by strong, directional lighting. Effects can be used alone or in combination with others to create a variety of stunning effects.

WALLFX®

Level’s proprietary printed emboss effect which allows select areas of a design to be raised and appear embossed. Designs featuring this effect are indicated by **X**.

SPOT GLOSS

A special ink formulation that allows for select areas of a design to be coated with a glossy finish. Designs featuring this effect are indicated by **G**.

METALLIC

True, reflective metallic effects, achieved through a combination of inks and materials. Designs featuring this effect are indicated by **M**.

WINDOW FILM

Several Level designs are now available on window film as a standard product. Designs that are printed on window film are indicated by **F**.

While these effects may be used to customize your mural, many Level designs now feature one or more of them as part of the standard design. These are indicated throughout this book and listed alphabetically below. Refer to the findyourlevel.com for additional designs featuring specialty effects.

Samples

While digital print technology allows for unparalleled design freedom, its print-on-demand nature necessitates some unique sampling and proofing solutions. Our goal is to provide the most accurate, beneficial, and cost effective tools possible to help you visualize the final product at various stages of development.

We have created an assortment of proofing devices, each targeted at demonstrating a specific task or specification. Depending on the complexity and level of customization associated with your project, you may receive one or more of these during the course of production.

Please visit the findyourlevel.com or contact your sales representative for more information regarding these tools or to order samples.

DESIGN MOCKUP

A digital mockup of your artwork in an elevation view (or superimposed over an architectural elevation upon request). The intent of this mockup is to demonstrate how a requested design will appear when sized, cropped, scaled, and/or customized to your specifications.

PDF | CREATED ON-DEMAND

FEELER SAMPLE

A small swatch of printed material is available for all Level **Product Types**. These demonstrate the various combinations of substrate material, inks, and coatings that are offered through the program, and include some basic specifications. Ordering **Feeler Samples** can be an economical way to consider multiple **Product Types** and/or various specialty effects (avoiding the need to order multiple **Strike-Offs**). Just curious? Your sales representative has a ring-set of all Level **Feeler Samples** and will be happy to show them to you to help you narrow your choices.

4" X 8" | AVAILABLE FOR EACH PRODUCT TYPE

MEMO SAMPLE

This is the primary sample tool for all Level **Design Standards**. The **Memo Sample** features a large detail crop of the design and includes swatches of any customizable colors within the design. It is printed on the design's standard material (typically a Type II vinyl). The **Memo Sample** is always accompanied by a **Sell Sheet** that includes a thumbnail of the full design, a photo featuring the design in a room setting, and information regarding the design's scalability, pattern repeat, and color style (tonal or solid). Learn more about this information at findyourlevel.com/ratings. Larger samples may be available for certain applications. Talk to your sales representative to see if supplemental sampling is right for your project.

8" X 10" | AVAILABLE FOR EACH STANDARD DESIGN

STRIKE-OFF

The **Strike-Off** is your final sign-off prior to production. It is printed on your specified substrate and features a crop of the final artwork, demonstrating its actual production size, scale, color, material, and layout. **Strike-Off** approval is required prior to printing to ensure your satisfaction.

36" X 52" | CREATED ON-DEMAND

The Level Difference: Creative Expertise + Technology

The Level team are experts in the use of digital print technology for the commercial interior décor market. With 20 years of experience, we have a deep knowledge and mastery of the intricacies of this technology. We also invest in the latest printing technology, research, and product development to offer the widest possible range of production options for our clients.

OUTSTANDING DESIGNS

The heart of the Level program is its growing library of extraordinary designs. And behind those designs is the Level team of talented stylists and designers, who combine years of experience with fresh ideas and new outlooks on commercial wallcoverings. We keep a close eye on commercial wallcovering trends and styles, and creatively interpret that research into **exciting new designs that designers, specifiers, and their clients will love.**

EXPERIENCED PROJECT MANAGEMENT

If you can dream it, we'll find a way to make it happen. Adapting artwork, illustrations, graphics or photography to a client's space and unique requirements is what we do best. With many years of successful projects under our belt, we know all of the unique challenges that come with custom digital wallcoverings, and we've amassed a considerable tool kit to address them. We continually manage projects and budgets of all sizes with the same care and attention to detail, and we're always eager to find the right solution for our clients.

STATE-OF-THE-ART PRINTERS & INKS

Level wallcoverings are printed using the latest advancements in UV-LED and dye-sublimation print technologies, on high-speed, large format printers. We maintain a close relationship with our hardware and ink suppliers, cooperating in R&D to improve the durability and applicability of our products. And our wallcoverings history and experience allows us to find solutions and tackle new challenges specific to **key commercial wallcoverings markets - healthcare, hospitality, corporate, and retail.**

UNIQUE PRODUCT SOLUTIONS FOR A WIDE RANGE OF APPLICATIONS

We offer roughly 20 different end products to suit a variety of applications, including Type II vinyls, environmentally friendly PVC-free wallcoverings, window film, acoustic fabric, rigid impact protection, and more. Many of our products feature WallMax®, our liquid laminate top-coat that provides additional durability and abrasion-resistance, and gives the printed surface of your mural a true Type II specification. We continually develop our product offering to keep up with the demands of the market and **provide new options for designers and specifiers.**

Environmental Responsibility

We proudly offer wallcovering options that meet the demands of our environmentally conscious customers without sacrificing the highest standards of artistry, quality, and durability. Level Digital Wallcoverings offers green solutions with our line of PVC-Free Wallcovering products as well as with our use of GREENGUARD Gold CertifiedSM inks. We continually strive to source new products and solutions to serve our growing environmental goals.

More from Level

Like what you see? This book is the 9th in a series featuring designs from the talented creative team at Level (Series 1 & 2 were compiled in our first book), bringing our total collection to roughly 200 designs and over 1,000 different standard color and technique options. Every one of these designs is still available to specify as-is or customize and can be found at either findyourlevel.com or in one of our earlier books:

LEVEL SERIES 1 & 2

LEVEL SERIES 3

LEVEL SERIES 4

LEVEL SERIES 5

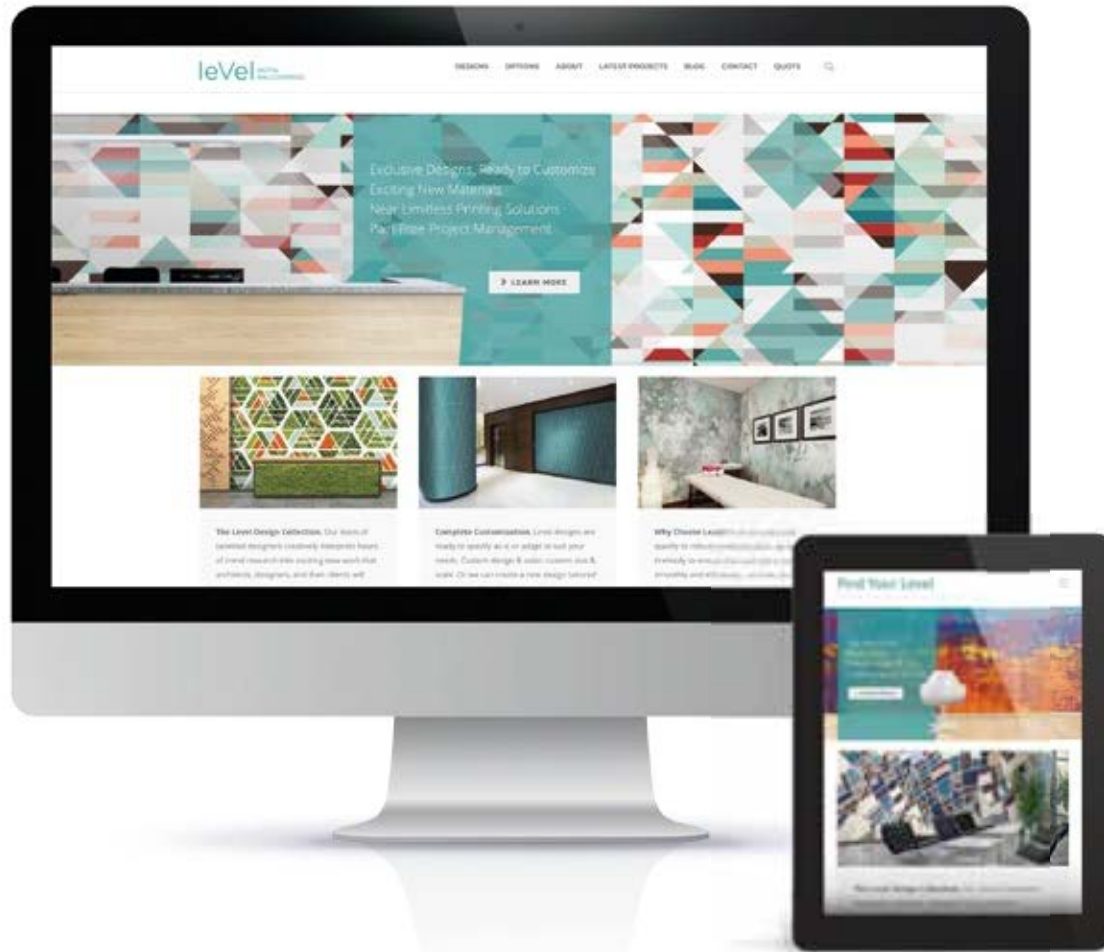

LEVEL SERIES 6
